

Eco-2 Banner Stand 33x80

SKU: BNR-ECO-2-33x80-VAR

If you need help understanding this template or need Graphic Design Service, please ask us.

-
- 1 Overall Artboard Size of this template is 33.5" W x 80" H This is 100% size. Do not change this size.

Layout your design at 100% size and minimum 150 dpi or 150 ppi.

Use CMYK Color. Do not use RGB.

-
- 2 Make sure all black in the design is Rich Black CMYK 75 / 75 / 75 / 100. If black is not set to these values, the black in the print *may* be less than desirable or have a colored hue.

We do not check that the black is set to these values before printing.

If Pantone Colors must be printed then...

- Colors must be listed on both the order AND the e-proof.
- Colors must be built into the artwork.
- The art file must be an Adobe Illustrator PDF or AI file that is editable.

-
- 3 The Green Border outlines the **Safe Zone**, 32.5"W x 78H. Everything inside Green Border will be visible in the finished product. It is okay to layout your design to the edges of the actual artboard, BUT be sure to position all critical elements inside of the Green Border. It is okay for critical elements to touch the green line as long as it is still inside of the line.

-
- 4 If there are Pantone Colors, art file must be an Adobe Illustrator PDF or AI file that is editable, but still has images embedded (not linked) and fonts outlined.

If there are no Pantone Colors, save file as PDF with images embedded (not linked) and fonts outlined.

Other acceptable file types are:

AI or EPS with images embedded (not linked) and fonts outlined.

TIFF, PSD, JPG flattened will also work, but not preferred.

-
- 5 Use this template as a guide. Before saving the print file, hide the Template and Notes layers so that they do not print. Only your art should be visible in the print file that is submitted for printing.
